

## Restore, Renovate & Repair With an Aqualux Pool Finish from ABGAL

Exclusive style and unmatched quality, Aqualux has been proven in Australian pools for almost 50 years.

Traditional pool interiors can be harsh on delicate skin - and an Aqualux interior doesn't just look good - it feels good too!

Smooth to touch and Sanitized for total hygiene, this low maintenance commercial quality membrane comes in a range of designer prints. From the rich blues of Bahama through to the pale creamy tones of Sandstone, there is an Aqualux colour to suit every pool.

Whether it's a simple resurfacing or structural changes like adding steps or even widening the pool - once repairs are complete, Aqualux is the perfect way to finish it.

Formulated specifically for the harsh Australian climate, each batch of Aqualux undergoes rigorous quality control testing before leaving the factory, so you can be confident you're getting the very best. Strong and flexible, Aqualux will keep your pool water-tight for years to come - guaranteed!

- ✓ Award winning technology

## Easy to Care For

One of the lowest maintenance pool finishes available, general maintenance is very simple - just make sure any equipment is compatible with a PVC finish, and if you've had sunscreen in the pool, give the waterline a wipe over with a soft cloth or sponge to prevent a scum line from building up. No scrubbing or harsh chemicals required!

## Flexible and Strong

At .75mm thick, Aqualux is the ideal thickness for durability without compromising maximum flexibility. In this dramatic show of strength (right), a 4WD is lifted off the ground, supported only by Aqualux. Capable of stretching up to 300%, it can flex and return back to position, making it ideal to repair structural damage in pool shells that have cracked with ground movement.

## The Installation Process

An Aqualux interior must always be measured for, and fitted by an experienced professional. Once your pool has been prepared and the Aqualux interior manufactured, the actual installation process takes just a day. And unlike other resurfacing options, there is no messy grinding or blasting required - installation is quite literally 'no mess, no fuss'.

Your pool is ready to use straight away - no drying, no curing - just fill and swim! Scan this code to watch an installation now.

## Guaranteed

In a domestic setting, an Aqualux pool interior is guaranteed to keep a pool shell watertight and for twelve years - and in the right conditions, most will last for years beyond this.

## Colour Range

You can see a selection of current colours on this page - for the full range, speak to an installer, or connect with us on facebook - [www.facebook.com/aqualuxpool](http://www.facebook.com/aqualuxpool)
